

Digital parenting tips

- Think about how you guide your family in the real world and how you can do the same in the digital world
- Try out the technologies your child enjoys - download some of their music and have a go at games they like
- Talk to friends and family about how they manage their children's digital lives
- Remind older siblings that websites they use may not be suitable for younger brothers and sisters
- Make digital issues part of everyday conversation - talking about subjects like cyberbullying, sexting and copyright infringement
- When you're talking about bullying, sex and relationships and other issues, don't forget to include the online aspects
- Talk to your children about whether the issues they face are different online and offline - or how online and offline work together to complicate their lives
- Don't be afraid to set boundaries and rules
- Talk to your child about their online reputation
